

16S ASV alpha diversity – plastic loading models

Weeks

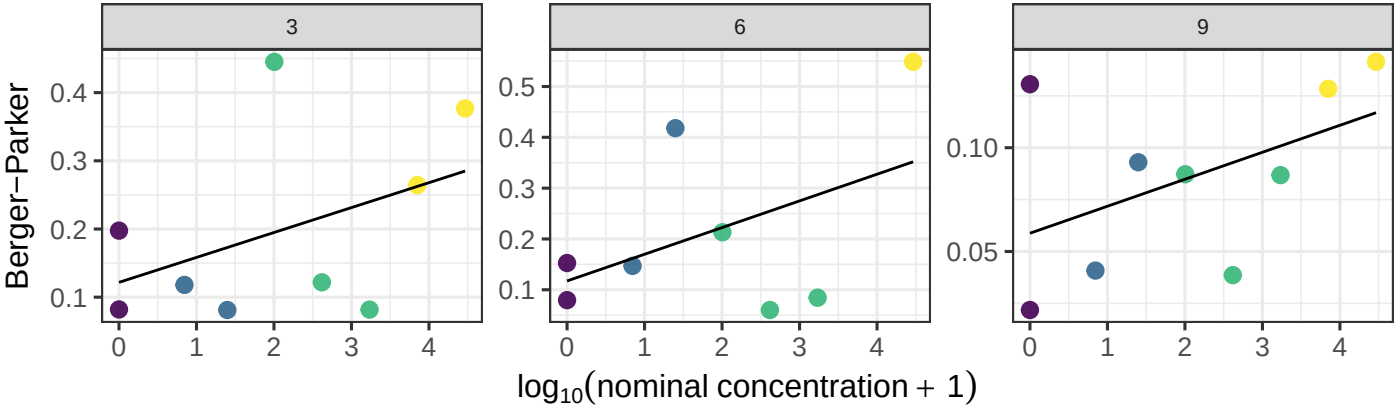

Interaction: p = 0.435 (BH = 0.653)
Within-group plastic slopes (BH):
3: p = 0.576
6: p = 0.576
9: p = 0.576

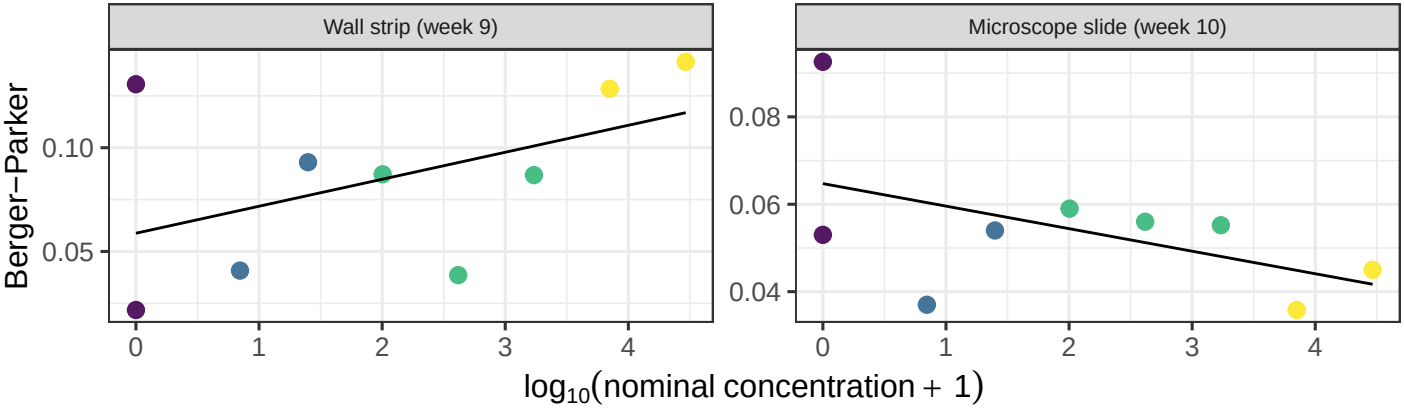

Location

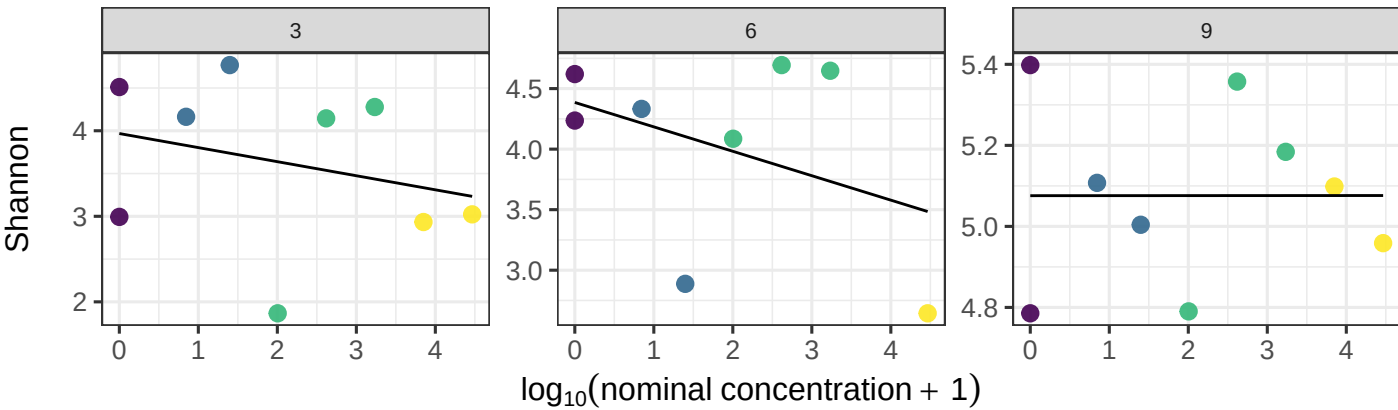

Interaction: p = 0.894 (BH = 0.894)
Within-group plastic slopes (BH):
Wall strip (week 9): p = 0.45
Microscope slide (week 10): p = 0.45

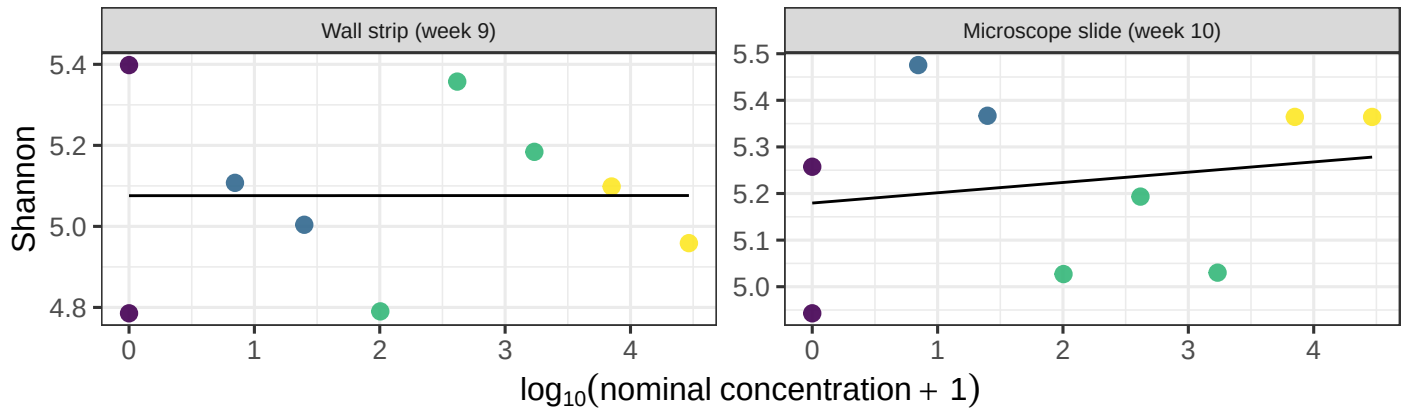

Interaction: p = 0.981 (BH = 0.981)
Within-group plastic slopes (BH):
3: p = 0.291
6: p = 0.291
9: p = 0.291
(model: logit Berger-Parker)

Interaction: p = 0.0869 (BH = 0.261)
Within-group plastic slopes (BH):
Wall strip (week 9): p = 0.191
Microscope slide (week 10): p = 0.191
(model: logit Berger-Parker)

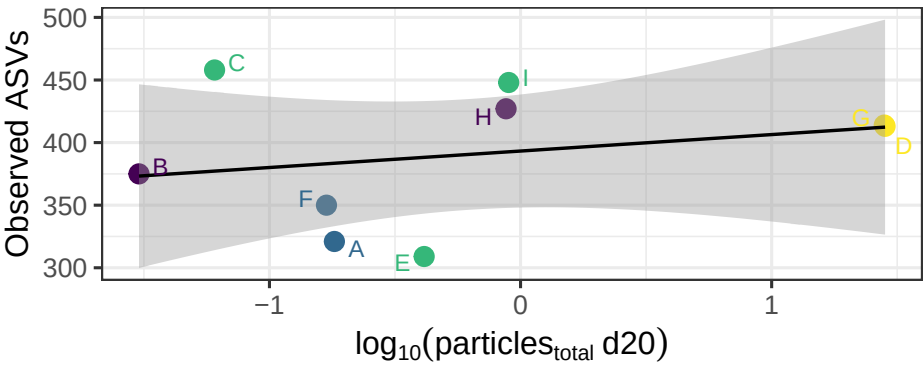

Interaction: p = 0.36 (BH = 0.653)
Within-group plastic slopes (BH):
3: p = 0.618
6: p = 0.618
9: p = 0.999

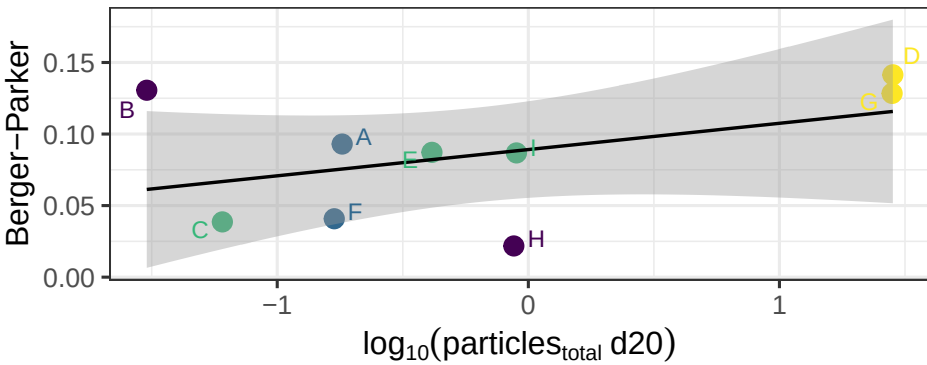

Interaction: p = 0.75 (BH = 0.894)
Within-group plastic slopes (BH):
Wall strip (week 9): p = 0.999
Microscope slide (week 10): p = 0.999

Week-9 wall strip | n = 9 corral

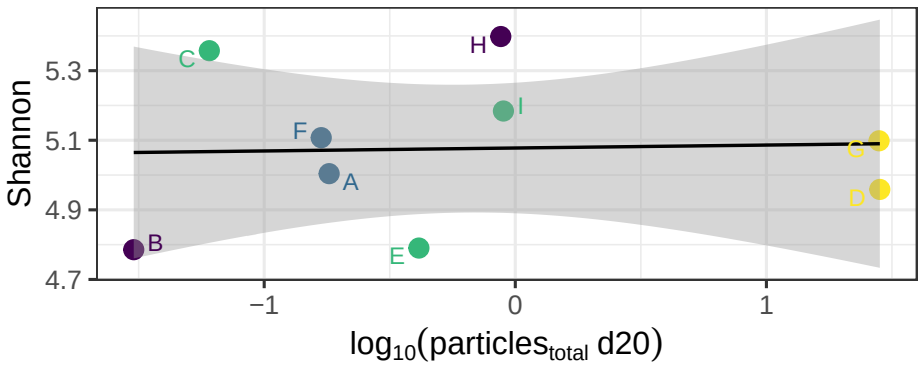

log₁₀(retention) slope: p = 0.506 (BH = 0.76)

Week-9 wall strip | n = 9 corral

log₁₀(retention) slope: p = 0.346 (BH = 0.76)
(model: logit Berger-Parker)

Week-9 wall strip | n = 9 corral

log₁₀(retention) slope: p = 0.917 (BH = 0.917)
